

HADEER ABDELRAZIK

Full Stack Software Engineer

+201022184011 | hadeermohammed412@gmail.com | Nozha, Egypt

[LinkedIn](#) [GitHub](#) [Behance](#)

BRIEF

Full Stack Software Engineer with 2+ years building end-to-end web applications, from React/Next.js interfaces to Express.js, NestJS, and PostgreSQL/MySQL backends. Experience delivering production e-commerce features including authentication, order processing, email integrations, internationalization, and responsive UI.

EDUCATION

B.Eng. Software Engineering | Istanbul Okan University, Turkey OCT 2020 – JUL 2024

WORK EXPERIENCE

Front-end AI Engineer Intern JUL 2026 – Present

FlyRank AI Company

- Develop and enhance frontend features for AI-focused web applications using modern React/Next.js workflows.
- Collaborate on user-facing interfaces and use AI-assisted development tools to support efficient implementation and iteration.

Full Stack Web Developer & Administrator SEP 2025 – Present

TUT Company — Egypt (Full-time)

- Manage and maintain the company's WordPress & WooCommerce e-commerce website; customize the Woodmart theme, build sections with Slider Revolution, and optimize SEO and performance.
- Built a separate full-stack e-commerce web application using Next.js, Express.js, and PostgreSQL, containerized with Docker and managed via Adminer; deployed on Hostinger with Git-based version control.
- Owned backend implementation across product catalog, order processing, Nodemailer contact forms, Google sign-in authentication, customer reviews, and multi-language support with i18n.
- Owned the core frontend UI design and implementation for the e-commerce application.

Frontend Engineer JAN 2025 – SEP 2025

Expansion Branding Agency — Cairo, Egypt

- Designed and developed responsive, user-friendly web applications with a strong focus on UI/UX.
- Collaborated with backend developers to translate designs into functional, high-performance web solutions.
- Optimized frontend code for speed, accessibility, and cross-browser compatibility.

CyberSecurity Intern NOV 2024 – MAY 2025

Depi Cybersecurity Program

- Developed experience in network security, penetration testing, threat analysis, and vulnerability assessment.

Software Engineer Intern JUN 2023 – SEP 2023

Scramblebit Company — Istanbul, Turkey

- Built full-stack website solutions with HTML, CSS, and JavaScript, improving user retention by 20%.
- Developed C# applications and optimized performance, reducing processing time by 15%.

Software Developer Intern JUL 2022 – SEP 2022

GrosWare Company — Cairo, Egypt

- Enhanced web tool functionality by 15% through new feature development.

PROJECTS

Accessories E-commerce [Live Demo](#) [GitHub](#)

Headless e-commerce monorepo with a Next.js 16 storefront and Express 5 REST API backed by Prisma and PostgreSQL; includes product catalog, cart, orders, reviews, payments, authentication, Docker, and database migrations.

Vessel — Coaching Agency Website [Live Demo](#) [GitHub](#)

One-page coaching agency website designed in Figma and built with Next.js 16, TypeScript, Tailwind CSS, and Framer Motion; features responsive layouts, scroll-based motion, magnetic CTAs, custom cursor interaction, optimized imagery, and reduced-motion support.

Furniro E-commerce [Live Demo](#)

E-commerce interface with UI/UX designed in Figma and built with Next.js, TypeScript, Tailwind CSS, lucide-react, and daisyUI.

H LAW Communication App

Flutter communication app with AI sign-language detection built using Python, OpenCV, Flask, and MediaPipe.

Cult Agency Website [Live Demo](#)

Marketing website designed in Figma and developed with React, Tailwind CSS, and JavaScript.
